Recent career history

Current role since March 2025 

Front End UI Developer & Web Accessibility Lead

Stafford, West Midlands, UK (mostly remote)

Alongside development duties, now also responsible for leading TopCashback's Web Accessibility initiatives.

As the company's subject matter expert, I spearhead accessibility audits, lead training, establish training plans and much more, to ensure regulatory compliance and that all services are accessible.

Promoted, extending duties from previous role

February 2022 to March 2025 

Front End UI Developer

Stafford, West Midlands, UK (mostly remote)

Working as a design-focused developer within the Design/UX team. Being the top Front End specialist at the company, my main purpose is to "bridge the gap" between UX Designers and Full Stack Developers.

Integral to many large projects, including Sitewide Navigation and Brand Pages redesign/rebuild, where I transformed flat designs into fully functional and accessible user interfaces.

May 2021 to February 2022 

UI Developer/Designer

Howden, East Yorkshire, UK

50/50 hybrid role between UI Developer and UI Designer. Main role was to design and develop captivating landing pages for co-branded promotional content.

Involved in the redesign of several key site features including Product Search and Product Information pages.

Degree & education history

Information & Communication Technology

Undergraduate level, achieved June 2021

First Class Degree with Honours

The University of Huddersfield

Course delved into many areas of computing, sparking my interest in Front End Web Development and UX/UI Design.

Performed a UX review/redesign of the NHS "Test and Trace" app, involving requirements analysis, user research and iterative user testing of new changes. Received a grade of 82%.

Previous education

3 A-levels in ICT, History & Biology

GCSEs including English, Maths & Science
